Experience

August 2021 - Present
JetSoftPro, Lviv
FrontEnd Developer

Project: An educational charity project for young people in Great Britain, the 'Experience' program connects state school students with industry-leading companies and networked support partners. It provides opportunities for young people from all backgrounds to gain valuable experience.

  Responsibilities:
- Implementing Azure Cognitive Search to enhance website performance;
- Creating and editing shared components for the entire project;
- Developing responsive views for mobile devices using Tailwind CSS for an existing website;
- Participating in requirements analysis for tasks and task estimation;
- Conducting manual testing of new features and performing code reviews of tickets.
  Tools and technology: RxJS, NGXS, Azure Cognitive Search, Tailwind, Git

Project: Google Chrome extension for Sales department & HR department. It works on LinkedIn and Sales Navigator, enabling users to search for LinkedIn profiles based on job vacancy requirements and store them in the CRM. It allows users to add contact details, schedule meetings, set reminders, and more.

  Responsibilities:
- Adding the ability to select multiple people from the search list and integrate them into the CRM and display them in the extension;
- Updating the styles of the extension using Angular Material;
  Tools and technology: Angular Material, Figma, Chrome tools;

Project: Application for competency matrix. The project aims to develop a product that enables employees to track their level of competence, plan their professional development within the company, and set goals to progress to the next level. This initiative helps enhance the professional skills of employees.

  Responsibilities:
- Developing the authentication module;
- Styled user interface components using the Angular Material UI library;
- Implemented the sidebar and header functionalities;
- Created reusable table components for efficient data representation;
  Tools and technology: HTML, Sass/SCSS, TypeScript, Bootstrap;

August 2020 - February 2021
Erat, Lviv
